

# ARAYASKUL Nada-San

D4, Ally course  
Obihiro University of  
Agriculture and Veterinary Medicine

*New Friend in Module 4 in Thailand*

**What research are you currently doing?**

**Genetic Engineering in Babesia ovata.**

**Why did you decide to attend the Ally course?**

**I want to take some more classes and have some lovely new friends.**

**What was your most memorable experience, lecture, or event taking the Ally course?**

**I was deeply impressed by the sub-module 4 that I had participated in Thailand. It's so intense and useful for me with new experience, not molecular genetics as my experiment.**

**How do you think your participation in the Ally course will help you in your future research?**

**I have gained new experience not only in zoonotic or protozoan diseases but also had an amazing time in Ibaraki from Toyoda sensei's class (Module3) about the neutron source.**

**Do you have any hobbies outside of research or activities that you often do in your spare time?**

**Yes, cooking and gardening is my hobby. I also enjoy listening to rock, jazz and classical music.**

**Do you have any advice for students who are thinking about attending the Ally course?**

**Please do it without any hesitation!!  
You will be glad to do that, no doubt.**

**Thank you very much, Nada-san, for participating in the interview.  
Please continue to participate in and enjoy the many activities in Ally course.  
We look forward to your continued success.**

*With Toyoda-sensei in Module3 class*
