

# The 85<sup>th</sup> Leading Progress

★Date : Fri. November 8th, 2019 6:00-7:00PM

★Venue: Lecture Hall

## Effect of blocking cytotoxic T lymphocyte associated antigen-4 in bovine leukemia virus infection

Kei WATARI, Laboratory of Infectious Diseases

 Immunology / immune checkpoint molecules / cytotoxic T lymphocyte antigen-4 / antibody / bovine leukemia virus infection

## Establishment of Serological Assays for Epidemiological Study of Crimean-Congo Hemorrhagic Fever in the Democratic Republic of the Congo

Boniface LOMBE P., Division of Global Epidemiology

 CCHFV / Recombinant nucleoprotein/ ELISA / Glycoprotein/ pseudotyped virus/ Neutralization assay/ Seroepidemiology/DRC

## The Role of Histone Lysine Demethylase 2B (KDM2B) in Endothelial Cell Carcinogenesis

Kevin CM GULAY, Laboratory of Comparative Pathology

 Hemangiosarcoma / Cancer / Epigenetics / KDM2B / Endothelial cell

## Genetic Analysis of Extended Spectrum $\beta$ -Lactamase Producing Bacteria in Zambia

Misheck SHAWA, Division of Infection and Immunity

 AMR/ ESBL / *bla*CTX-M-15 / Transposition
