

INCREASING PREPAREDNESS BY NETWORKING

The network “Rodent-borne pathogens”

Introduction to a platform for an interdisciplinary collaboration to combat rodent-borne diseases with four main objectives; discovery of novel viruses, study Norway rats as pathogen carriers, studies on hantaviruses and *Leptospira* spp. and development of novel tools to study rodent-borne pathogens.

By

PROF. RAINER G. ULRICH

*Institute of Novel and Emerging Infectious
Diseases,
Friedrich-Loeffler-Institute,
Federal Research Institute for Animal Health*

January 29th, Wednesday, 16:30-18:00

**CZC, WHO-collaborating Centre
Conference room**
